(+62) 823-2111-5667 | Bandung, Jawa Barat

SUMMARY

UI/UX and Interaction Designer with over 8 years of experience in the B2B and SaaS landscape, specializing in CRM, ERP, and large-scale digital transformations. Proven track record of empowering businesses through scalable design, robust design systems, and intuitive user experiences. Passionate about simplifying complex workflows to empower cross-functional teams and delight users.

PROFESSIONAL EXPERIENCE

Radya Labs (PT Raditya Alkademi Digital)

Bandung, Jawa Barat

UI/UX Designer & Graphic Designer

November 2025 - April 2026

- Led the UX/UI redesign for enterprise-level applications, successfully delivering an Employee Service System for KOMATSU and a Free of Charge (FOC) system for UT/Komatsu.
- Streamlined complex user workflows through comprehensive user flow analysis, translating requirements into wireframes and high-fidelity prototypes using Figma.
- Contributed to the strategic development and maintenance of the company's internal design system to ensure consistency across products.
- Collaborated closely with developers and product managers to ensure seamless handoffs, design consistency, and optimal usability.

Radintera (PT Karya Inovasi Digital Nusantara)

Bandung, Jawa Barat

Freelance UI/UX Designer & Graphic Designer

July 2024 - March 2025

- Spearheaded the UX/UI design and development of the official website for Hayya Kalibrasi Indonesia, driving a 20% increase in user engagement through an interactive, user-centric interface.
- Delivered comprehensive graphic design solutions for both digital and print marketing materials, ensuring strict brand consistency across all visual touchpoints.

eFishery (PT Multidaya Teknologi Nusantara)

Bandung, Jawa Barat

Interaction Designer (UI/UX Designer)

January 2018 - February 2025

- Architected and maintained the Onefish Design System (v1 & v2) adopted across all mobile and desktop applications, significantly boosting design team efficiency by 80%.
- Created a repository of reusable, modular illustrations integrated within the design system, reducing new illustration production time by 50% and cutting visual production costs by 70%.
- Authored comprehensive component documentation, including usage guidelines, design rules, and code snippets, accelerating the onboarding process for new design and engineering teams.
- Designed and launched impactful farmer-facing products, including IoT-integrated apps (Product AIoT / Feeder Apps) and e-commerce platforms (eFisheryKu, eFishery Fresh).
- Developed sophisticated internal operational dashboards that streamlined workflows and improved overall operational efficiency across multiple business units by 30%.
